

NATHÁLIA PINTO DO RÊGO

Software Development Student

Personal Skills

I developed a strong passion for programming and began studying it independently in 2022. I started with an Introduction to Programming course on the MOOC.fi platform, where I learned the basics of Python. To deepen my knowledge, I joined the Digi-Duunipaja program at Tredu in March 2023, which significantly enhanced my ICT skills. In October 2023, I was accepted into a course at Sasky where I am also learning C#. Additionally, I am enthusiastic about web development and have been advancing my skills in HTML, CSS, and JavaScript.

I am a fast learner who thrives both in team settings and when working independently. I am sociable and easily connect with others.
